RESUME OF WARREN W. DENNER

Warren W. Denner was born in Portland Oregon on 9 February 1938. In June 1961 he received the Bachelor of Science degree from Portland State College, with physics and mathematics as major courses of study.

In September 1961 he entered graduate school at Oregon State University in Corvallis. In June 1963 he received a Master of Science degree in Oceanography, with minors in mathematics and physics. He received the Doctor of Philosophy degree in 1969. His research was in ocean current prediction.

The summers of 1962 and 1963 were spent at the Naval Ordnance Test Station, China Lake, California, where he worked in the area of ocean turbulence.

In July 1963 he joined the staff at the University of Alaska. During the year on the faculty he helped this institution prepare a program in physical oceanography. Research was pursued in regional oceanography, turbulence, and large amplitude shallow water waves. He also taught an introductory graduate level course in physical oceanography.

In July 1964 he joined the faculty of the Naval Postgraduate School as an Assistant Professor in the Department of Oceanography.

In January 1974 he took a three-year leave of absence to become Director of the Naval Arctic Research Laboratory at Barrow, Alaska.

His current research is in ocean current prediction, regional oceanography, air-sea interaction, and acoustic propagation.

On 1 October 1979, Dr. Denner accepted a professorship with the Department of Physics, St. Johns University. At that time he transferred to the adjunct faculty of NPS.

He is a member of Phi Kappa Phi, the American Geophysical Union, the International Oceanographic Foundation, and the American Meteorological Society.
